

AV Requests

- Lavalier or countryman microphone (really anything as long as it's wireless)
- Projector screen and projector
- Access to a laptop being used for the event (provided it has PowerPoint 2010 or newer). As a last resort Jeff can use his own computer, but he prefers to plug directly into your existing A/V setup.
- One bottle of water, pretty much any temperature except for frozen. Or boiling – that would be bad too.
